

### International High-Volume Payments Platform

The client, a leading global financial institution with operations in more than 50 countries, is heavily focused on creating a competitive advantage through its support of customers' international payment needs.

#### CHALLENGE

- Third-party platform unable to support high-value payments
- Rapid globalization schedule compromised by separate payment systems
- Need for consistent customer experience

#### WHY ABEAM?

- Deep payments experience, including knowledge of how customer, product, and platform interactivity
- Familiarity with payments systems of all countries targeted for expansion
- Project management frameworks and methodologies for expediting information discovery and decisions

#### SOLUTION

- Manage and coordinate development of functionality for third-party platform
- Understand ACH and wire payment and clearing systems in targeted countries
- Identify 1,000+ requirements for integrating wires with ACH platform
- Prioritize requirements based on global expansion schedule and customer needs
- Create roadmap for building functionality
- Identify enriched functionality needs and automation for faster STP rates
- Coordinate efficient development, testing, and implementation

#### REAL BENEFITS

- Efficient system supporting high- and low-value payments in targeted countries
- Competitive advantage from significantly expedited global expansion
